

please do not overturn nj do not call. telemarketers have not only become more aggressive they at more than one accasion have insulted and harrassed me. if I wanted their product I would look into it through other means. I have felt like a prisoner because of the telemarketers in my own home. I pay my phone bill and I do not wish to pay for the harrassment (their calls). at one point they were calling all day and that can drive a person insane. there are enough stresses in life this should not be one.
